Dear Stepping Stones Family Member,

For the next several months, the children will be learning about their heritage. We will identify the origin of their ancestors on a world map, and share their family history and family photographs with the class.

We are extending a warm invitation to you to visit Stepping Stones to share a bit of your memories. You are welcome to share a family story with the group, if you like. You might choose to tell a story from your childhood, or a story passed down to you from your own ancestors. You are welcome to bring something special to share with the children - a toy from your childhood, a favorite book, and clothing, something from your family traditions - whatever you think might interest the children.

We will probably have your visit occur during our circle gathering time - around 10:20a.m. If you would like to participate, please telephone me (530 265 6287) and we can reserve a date.

We expect that the children will be delighted to meet you! It is our hope that this exploration into the children's heritage will foster their enjoyment, awareness and appreciation of cultural differences and similarities.

Thank you,
